300+

Specialist Agents
across different domains

Execution Trajectories, logs, failure cases

Validated New Versions

L1 Agent Evolution Loop (Improve WE's Capabilities)

Trajectory Analysis

Aggregate and diagnose
usage evidence

Generate Improvements

Update prompts / skills
/ tools / harness

Validate (3 Gates)

Regression safety; Target
achievement; Robustness

L2 Meta Evolution Loop (Improve MA's Improvement Methods)

Accumulate Experience

Problems, attributions,
modifications, validations results

Cross-Task Knowledge

Improvement patterns (with
applicability conditions)

Update MA

Refine attribution methods
and improvement strategies

Benchmark OS

Tasks

real-world
& offline
constructed

Envs

reproducible
execution

Sandboxes

isolated
execution

Verifiers

program &
model judges
